New Products

Sprint Plus Milk Powder

Skim-based calf milk powder sprint plus 36%

Is specifically designed to promote healthy growth and development in young calves. Formulated with high-quality skim milk, this product provides essential nutrients, including protein, vitamins and minerals, to support optimal calf nutrition and development. It also contains a unique gut enhancer package to support digestion.

Optimal calf nutrition

Our skim-based calf milk powder is easy to mix, highly digestible, and ideal for calf rearing. It helps build strong immune systems, promotes weight gain, and ensures healthy digestive function.

A head start for your calves

Give your calves the best start with our premium skim-based milk powder, Sprint Plus 36% — developed to meet the needs of modern dairy farmers.

- 36% premium skim based milk powder
- Highly digestible powder, ideal calf for rearing
- Promotes a strong immune system, weight gain
- Contains a unique gut enhancer package to support digestion
- Crude protein 22%
- Crude fat 18%
- 20kg paper bags for easy recycling

Heavy Bunker Mat

Why use a bunker mat

Intershape's bunker mat is a joint collaboration with Animat and Silostop Agri. Our long standing relationship importing Animat rubber into UK has lead to a bunker mat being made from Dairy A grade rubber, with the practical elements of silage pit management from Silostop Agri.

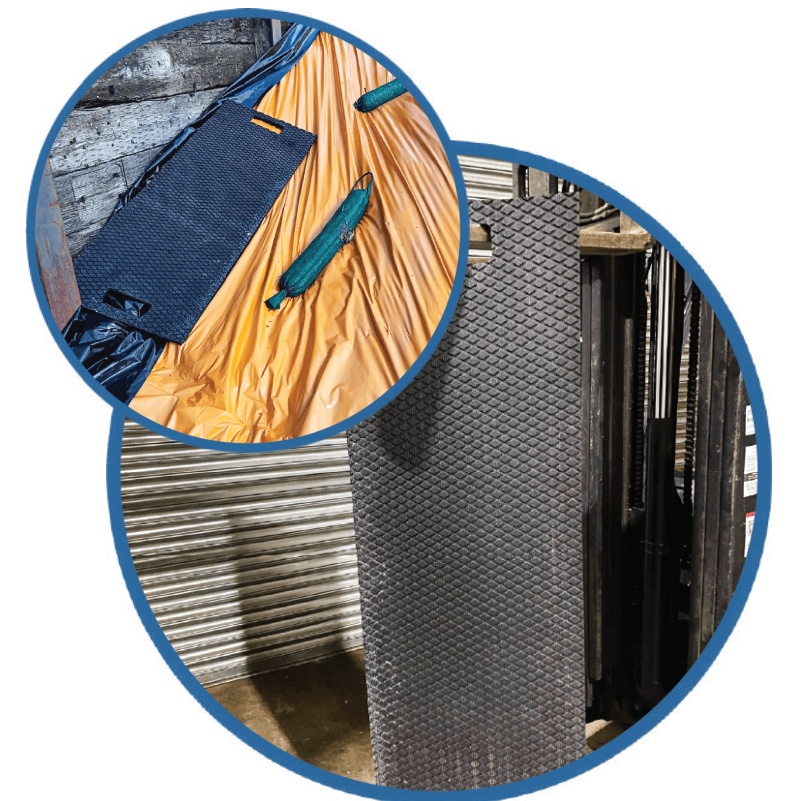

Bunker mats are wire free and do not retain stagnant water. The heavy weight mat applies an even 31 psi of pressure per square meter, helping to remove air pockets and in turn increase feed quality and wet content of the feed. The 22kg mats come with a combined forklift and grab handle making it easier and quicker to sheet and un-sheet the clamp.

Area of use

- Edges of the clamp
- Front of clamp
- Joins between wall sheet and top sheet

Specification

- A+ Dairy Grade rubber
- 75 A shore hardness
- Max grip or pebble top finish
- 610mm X 1800mm
- 22kg
- Combined pallet tine and grab handle

animat

Flex Air Stall

The first combined ventilation & cubicle system

Recent Eurotier 2024 winner, the Flex Air Stall is the first combined ventilation and cubicle product to be released into the dairy industry. The benefit of moving the ventilation directly to the cow within the cubicle, increases lying time and in turn milk production. The reduce risk of heat stress aids cow welfare.

Flex Air Stalls improve cow welfare by delivering fresh air directly to the cow through a tube ventilation system. Fresh air from outside the building flows through the tube ventilation, down solid pipes, into the cubicle loop. The fresh air exits out of the cubicle onto the cow through multiple 10mm holes. The air being blown directly onto the cow reduces the need for multiple fans and lowers power consumption. This efficient air distribution minimises waste ventilation, enhancing overall system efficiency. By targeting airflow to the cubicle, Flex Air Stalls increase lying time, improve cow comfort, and support farm productivity and cow longevity.

Area of use

- Cubicle housing sand and mattress

Specification

- Tube ventilation system made to suit run length
- 75mm OD, 12mm wall thickness cubicle loops
- 60mm posts
- Hot dip galvanised finish on metal parts

COW-WELFARE™

Rubber Matting & Parlour Pit Mats

Intershape has been importing, supplying and installing rubber matting for 30 years. From our understanding of customer requirements we are proud to have a long standing relationship supplying Animat into the UK market. Animat rubber is made in Canada and comes with a 7 year warranty, more importantly 100% recycled rubber is used. Scan the QR code for more details.

'Parlour had rubber fitted many years ago, recently added at the front of the collecting yard which has completely transformed cow flow into the parlour and now done exit race and handling areas.'

George Winstone

Pebble Top Matting

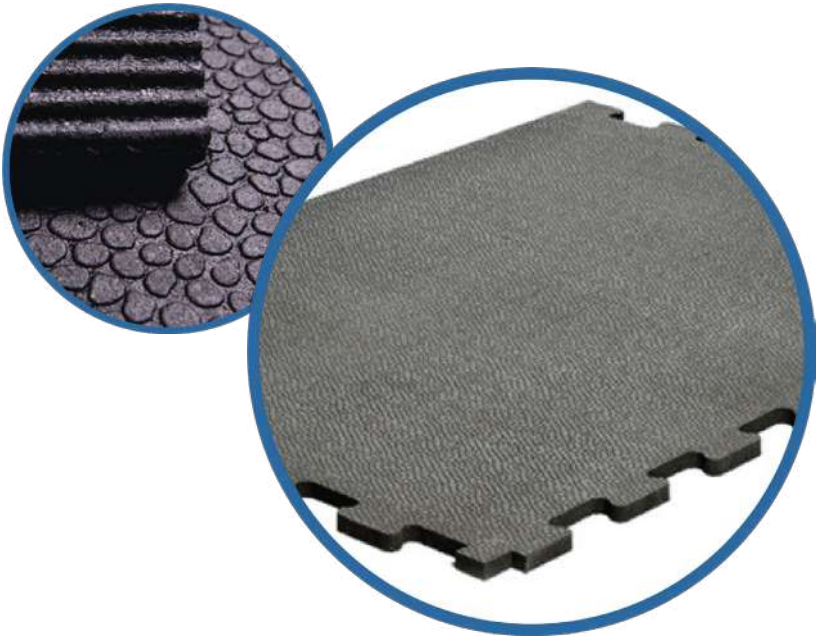

Rubber Flooring with a unique pebble-top design, manufactured using the highest quality 100% recycled rubber, provides excellent surface traction for all types of livestock, wet or dry.

Area of use

- Slatted floors
- Feed fence
- Parlour entry & exit

Specification

- A+ Dairy Grade Mats
- Anti-Slip, Pebble Top Surface Texture
- Abrasion Resistance
- 100% Recycled Rubber
- Narrow Ripple Grooved Bottom
- 19mm Thick Vulcanized Rubber
- 1.8m x 1.2m standard mat size

Maxgrip Matting

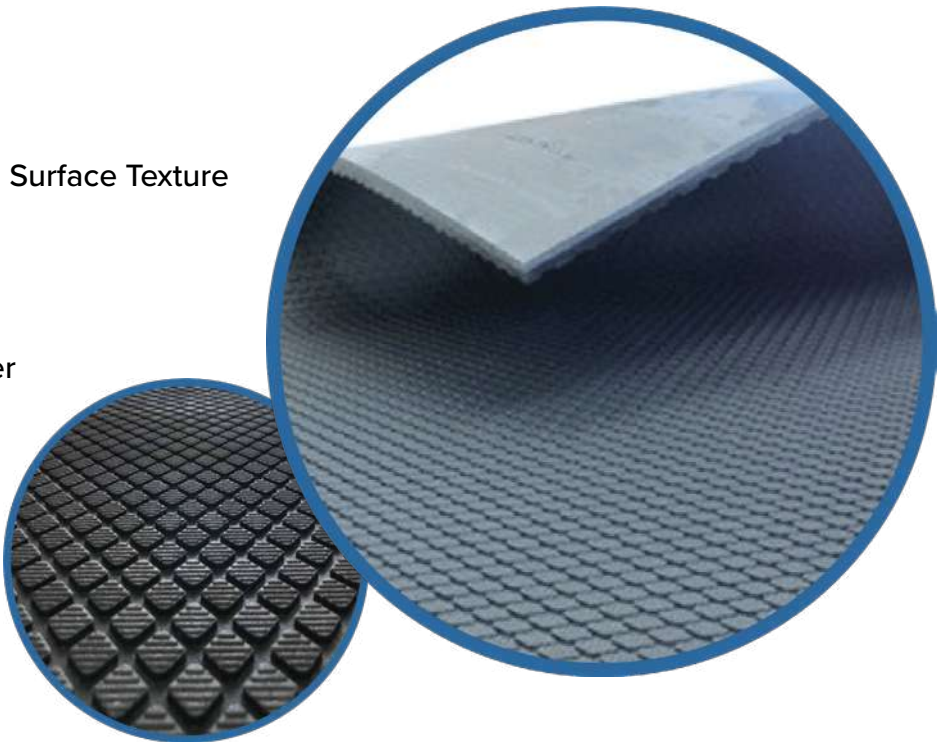

This high quality rubber mat has been designed specifically for livestock housing where extra traction is the number one objective.

Area of use

- Slatted floors
- Handling systems and passages
- Slopping floors

Specification

- A+ Dairy Grade Mats
- High-Grip Raised Diamond Top Surface Texture
- Abrasion Resistance
- 100% Recycled Rubber
- Flat Bottom
- Superior Traction
- 20mm Thick Vulcanised Rubber
- 1.8m x 1.2m standard mat size

Slat Matting

Flooring with either pebble-top design or maxgrip design, manufactured using the highest quality, 100% recycled rubber. Slat mats offer great drainage along with being hard wearing.

Area of use

- Passage areas
- Collecting yards
- Lie back areas

Specification

- A+ Dairy Grade Mats
- Anti-Slip, Pebble Top Surface Texture
- 100% Recycled Rubber
- Narrow Ripple Grooved Bottom
- 19mm Thick Vulcanised Rubber
- 1.8m x 1.2m standard mat size

"Great system. Got 200 over 15 years old and 75 at 4 years old, little difference in comfort and such an easy clean top cover."

Andrew Hockridge

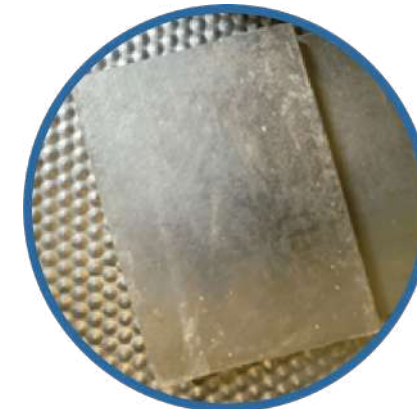

Softbed was originally developed 30 years ago, and through continual development continues to deliver our customers a return on their initial investment in a mattress system. Softbed is a Global Indo Rubber re-inforced rubber continuous top cover over a sealed heavy duty European foam filling. Softbed provides outstanding comfort, durability, and is one of the heaviest and hardwearing top covers available on the market.

Rubber Softbed Mattress

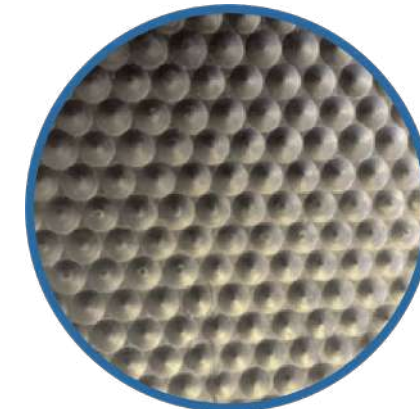

Seamless top cover and 100% waterproof. Extremely easy to clean and hygienic. All Rubber Softbed top covers come with a 10 year conditional warranty.

Specification

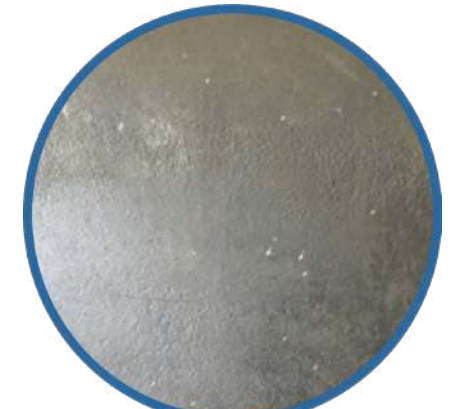

- 22mm overall thickness
- 1800mm deep
- Vulcanised rubber with nylon reinforcing

125x22mm profile

Hammer finish top

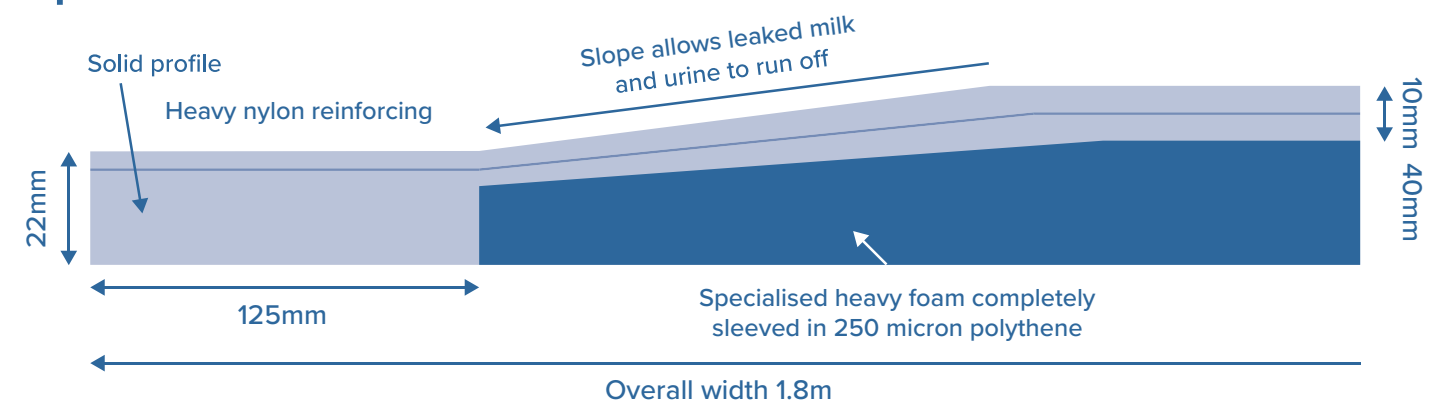

Smooth underside

Rubber Softbed Filling options

Softbed has a choice of PU foam and Latex fillings. The fillings range start from 30mm to 60mm thickness. All PU foam and latex fillings come with a 10 year conditional warranty.

Specification

Rubber Rollout Mattress

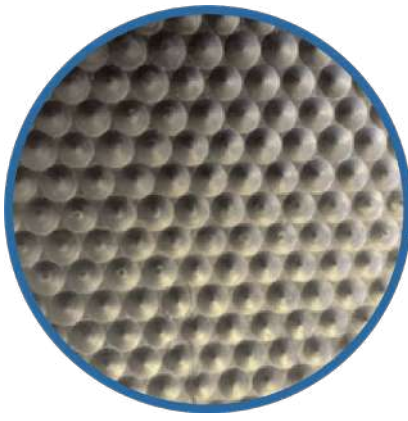

Simple and durable, this one-piece vulcanised rubber roll out mattress offers a quick and easy way to aid hygiene and comfort within your herd. Quick and easy to install, this mattress comes with a 5 year conditional warranty.

Specification

- 15mm overall thickness
- 1700mm deep
- Vulcanised rubber with nylon reinforcing

50 x 12 mm profile

Hammer finish top

Studded underside

Nicolon Latex Mattress

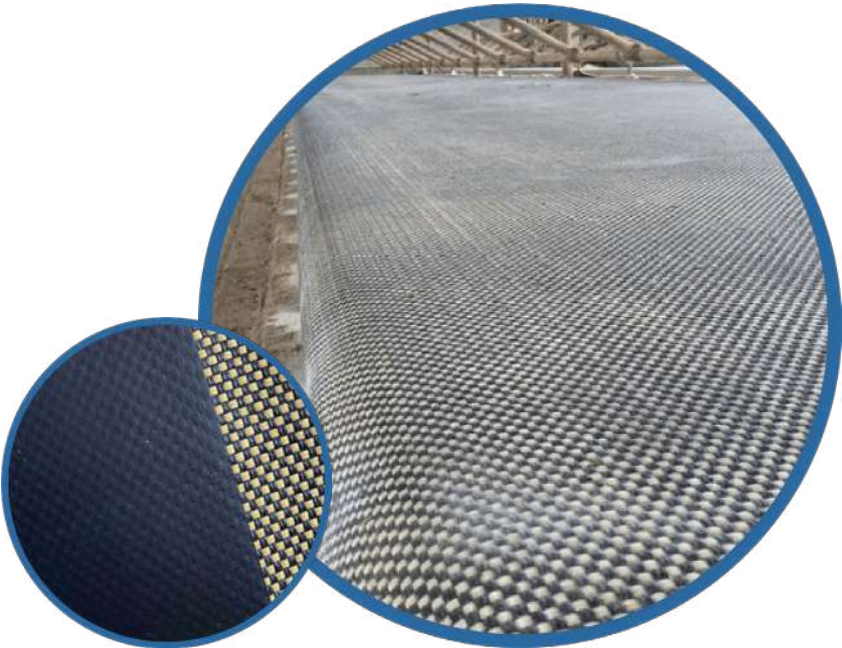

Solmax Nicolon has been fitted to cubicle beds since 2000. The DLG tested Woven polypropylene top cover has high levels of abrasion resistance. The woven finish creates a non slip surface along with the ability to retain sawdust or green bedding. Nicolon is a continuous roll Mattress system reducing joins and areas for bacteria to build up. Woven design also allows the top cover to breathe. 5 year conditional warranty.

Key benefits

- High resistance to abrasion
- Non slip top surface
- Easy clean
- Continuous roll mattress system

Specification

- 3mm polypropylene fully DLG tested
- Impermeable underside seal

Softmountain Mattress

Animat mattress rubber top cover, offers high yielding, housed all year round cows a clean, safe and comfortable top cover. The rubber top cover has a lightly textured top surface to allow retention of bedding without causing abrasions to the cow. Easy to clean and manage as the rubber is non porous. Softmountian mattress is a continuous roll mattress system reducing joins and areas for bacteria to build up. 7 year conditional warranty.

Key benefits

- High resistance to abrasion
- Non slip lightly textured top surface
- Easy clean
- Continuous roll mattress system

Specification

- 3mm reinforced rubber fully DLG tested
- 75 shore A hardness

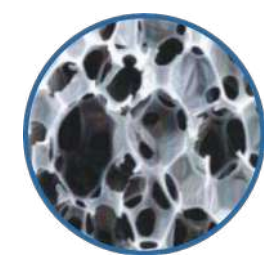

Latex Filling Options

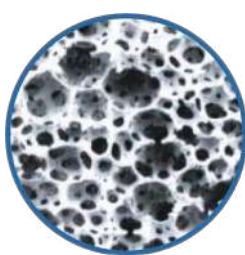

Intershape only uses Federal ECO Foam Latex foam for our mattress systems. The use of latex throughout our 30 years of trading has proven to us the longevity and high level of cow comfort of Latex foam for cow mattresses.

Key benefits

- Latex mattresses provide excellent support to the top cover as well as the cow and does not go lumpy or harden.
- Motion Isolation, like memory foam, latex can absorb motion, minimising disturbances
- Breathability & Temperature Regulation, latex has an open cell structure that promotes airflow.
- Natural latex, derived from the sap of rubber trees, is an eco-friendly material commonly used in sustainable products.
- Durability, Pure latex mattresses are known for their longevity.
- Three options: 30mm latex / 40mm latex / 20mm PU Foam

PU-comfort foam

Cubicles & Passage Gates

Along with offering mattress solutions, it's a natural expectation of our customers to offer cubicles and gate solutions for passages. We have 3 ranges of cubicles to pick from, as not all dairy housing is the same. We offer a range of steel cubicles to cater for different cow sizes. We also offer a range of flexible cubicles, offering increased lying time. Intershape products focus on cow comfort. Scan the QR code to find out more.

Mattress Loop

Our mattress loops are specifically designed to work with our mattress systems. All loops are custom made to suit the size and shape of each herd. Carrier rail system along within an adjustable brisket and head rail, allow further refinement when the loops are installed or cow size changes.

Area of use

- Cubicles for youngstock
- Cubicles for milkers

Specification

- 60mm OD tube
- Post and carrier rail system
- All fittings M12
- Hot dip galvanised finish
- Choice of brisket boards

Sand Loop

Our sand loops have been influenced by practices adopted in North America. Designed to work with sand beds 150mm to 200mm deep. Straight lower leg of the loop forces the cow to lie straight which in turn promotes a cleaner bed.

Area of use

- Cubicles for milkers

Specification

- 60mm OD tube
- Post and carrier rail system
- All fittings M12
- Hot dip galvanised finish

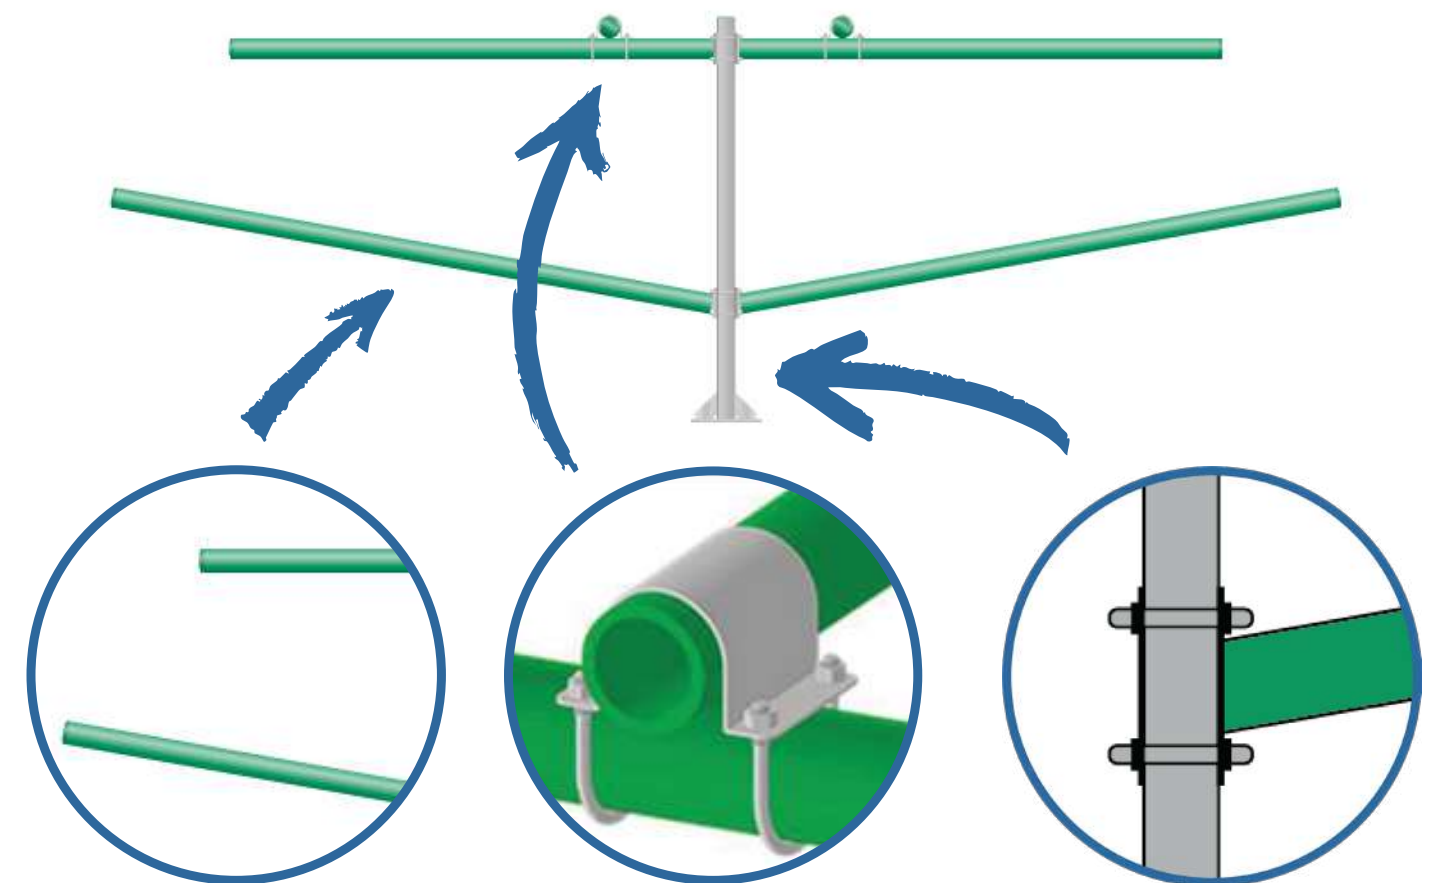

Flex Stall

Flex stall, is an open ended, flexible cubicle loop. The opened loop allows cows a quick and smooth entry and exit of the bed. The flexible loop aids cow welfare and can increase lying time by 1.5 hours a day. 10 year warranty.

Options

- Head to Head and single run
- Suitable for both sand and mattress beds
- Base plate or concrete in post
- Stainless post

The open passage allows the cows to exit the cubicle safely and efficiently

The neck rail is adjustable to suit cow size

The position of the pipes is adjustable to suit size of cows

Spinder Cosmos Cubicle

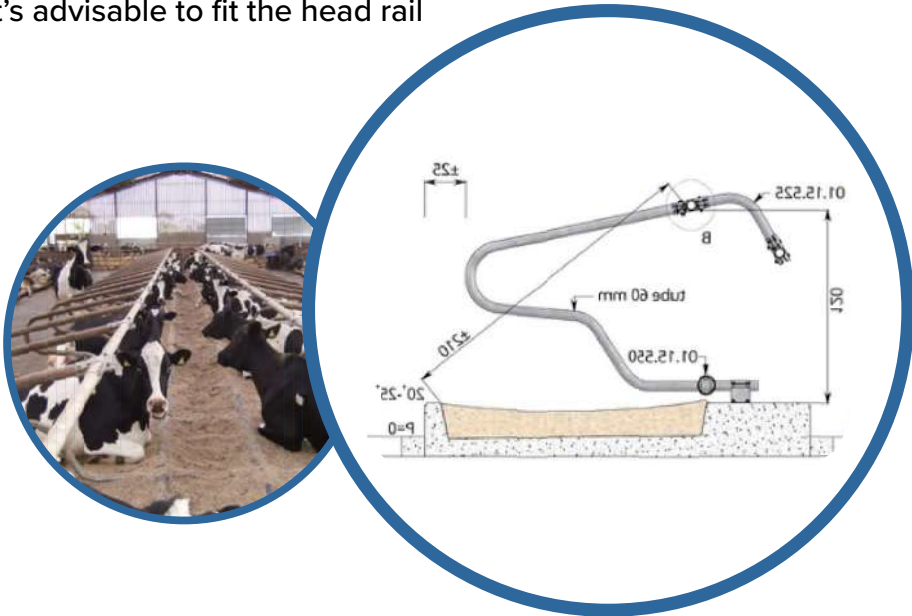

The Spinder ‘Cosmos’ is an open cubicle divider. This creates a large and spacious lunging area and is very cow friendly. The open loop allows natural movement when entering and exiting the cubicle. Cosmos cubicles come with fully adjustable brisket tube. The neck rail and bolt to floor tube clamps fix the cubicles into place, removing the need for a post. Helping for an easy install and an open style cubicle divider.

Area of use

- Milkers on sand
- Milkers on mattress
- Note if used as heifer cubicles, it’s advisable to fit the head rail

Specification

- 60mm OD tube
- Bolt to floor
- 125 OD brisket pipe
- Hot dip galvanised finish

Spinder Cubicle Splitter Gate

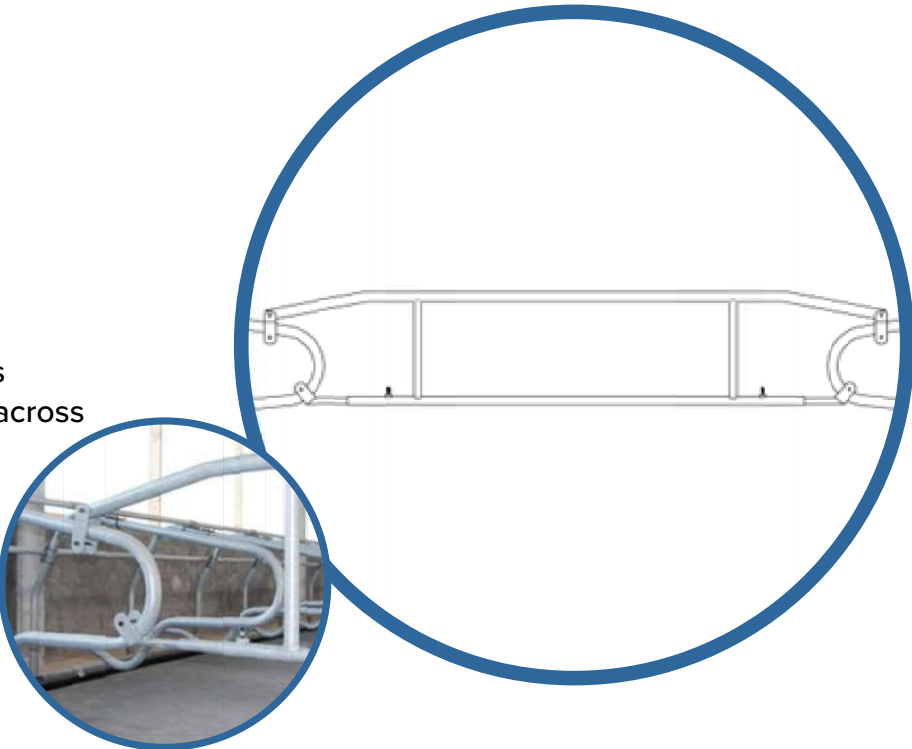

Splitter gates are designed to bolt to the cubicle loop forming a barrier across the cubicle passage. Splitter gates can help with the temporary splitting of cubicle sheds and in turn help herd management.

Area of use

- Cubicle housing

Specification

- 60mm OD tube
- Hot dip galvanised finish
- Bolted to cubicle loop
- Cover 2.1m to 4m wide passages
- Adjustable tube design to work across different passage sizes

Spinder Barrier Gate

Spinder barrier gates are able to adjust between different passage sizes. Sprung loaded mechanism allows easy operation and seamless 360 degree swing, in a one person operation. The single bar and post design is simpler to fit and manage when compared to up and over gates. This gate is very simple and flexible.

Area of use

- Cubicle housing
- Collecting areas

Specification

- Hot dip galv finish
- Rotated 360 degrees
- Sprung loaded mechanism
- Bolt to floor post
- Cover 3m to 5.5m

Spinder Track Gate

2024 Eurotier winner, the Spinder track gate increases your ability to manage and handle your cows. The track gate allows you to effortlessly adjust space within the shed depending on group size. As well as sliding along the full length of a passage to allow splitting, the track gate has in built sliding gate. Allowing a 1.5m passage within the gate, for sorting and easy access into other areas of the shed.

Area of use

- Cubicle housing
- Collecting areas

Specification

- Hot dip galv finish
- Maximum passage width of 1.5m to allow livestock and people to pass freely in the passage
- Locked into place with locking pins
- Nylon rollers, for easy pushing
- Cover 2m to 4m passages

Feed Fence & Troughs

Intershape offers feed fence options to suit a variety of livestock feeding systems. We also offer a range of stainless steel water troughs. Scan the QR code for more details.

View the website section

Self Locking Yokes

Self locking yokes can be set to lock animals individually. 60OD 5mm top and bottom bars, 48OD fixed uprights. Each space has an adjustable neck width and rubber stoppers to reduce noise.

Available to suit 4.5m to 6m openings.

Swedish Self Locking Yokes

Ideal for horned cattle or to allow greater head movement in and out of the yoke when not locked.

Available to suit 1.8m to 3.25m openings.

Water Troughs

Stainless steel water troughs wall mounted or free standing.

All troughs come with a quick empty valve and a covered service box.

Available in sizes from 1.2m/155l to 1.8m/255l.

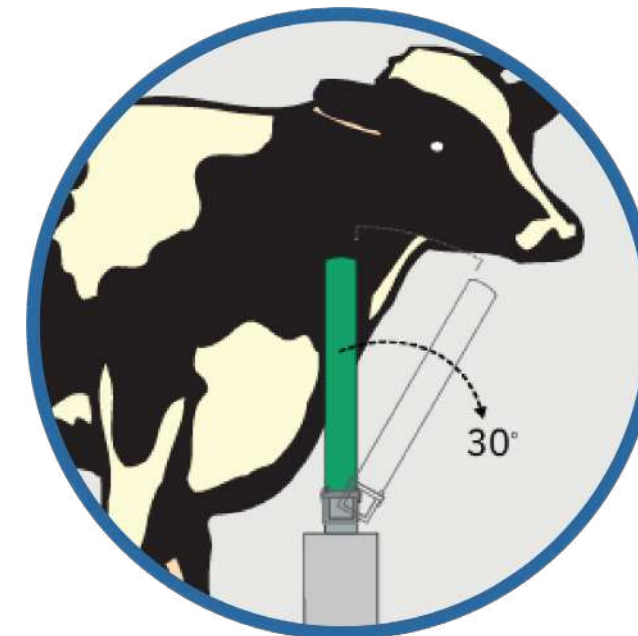

Flex Feed

Flex feed is a 30 degree tilting feed fence, to allow un-reachable feed, reachable. This allows for greater feed intake, with out rubbing of neck and shoulders. Flex feed comes with a 10 year warranty.

Advantages of Flex Feed

- Cow eats the same amount of feed in less time
- The cow can reach further on the feeding table
- Individual feeding area reducing “boss cows” ability to push other cows out or along the feed face
- No horizontal top rail helps to allow natural head height for feed intake
- No bruising or damage from the feed fence
- Adjustable widths to suit 3m to 6m openings

**Scan QR code

Curtains & Ventilation

Intershape through the years of being involved with livestock housing, has grown its product range to include ventilation related products. We offer very simple products through to fully automated products. Scan the QR code to see more details on the products shown below including videos.

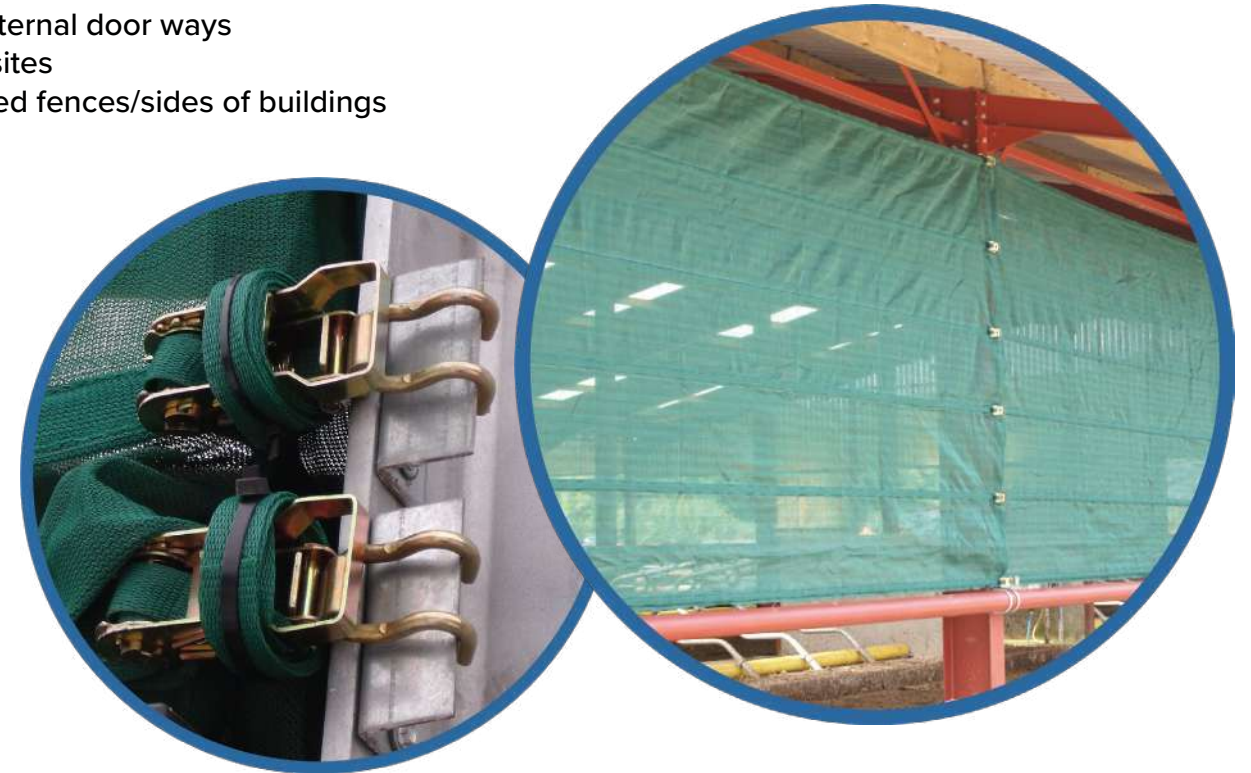

View the website section

Secure Windbreaks

Simple and easy fit windbreak with a ratchet tensioning system. Offering 75% reduced wind speed, these windbreaks are an ideal quick solution in high wind areas. Widths are available from 3.7m through to 10m and heights available from 1.5m through to 4.5m.

Area of use

- Above external door ways
- Building sites
- Above feed fences/sides of buildings

Secure Econoblinds

Simple manually raising and lowering blinds, using a track and trolley system. The manually raising and lowering curtains allow access to buildings as well as protection from wind and rain. Easy to self fit and install.

Widths are available from 3.7m through to 6.3m and heights available from 2.5m through to 4.5m.

Area of use

- External and internal door ways
- Polly tunnel entrances
- Above feed fences/side of buildings

Fully Automated Curtains

Intershape is the UK importer and distributor for AirKoe offering automated curtain systems. Automated curtains work with a weather station, and the main aim is to offer the best of both worlds by optimising natural air flow whilst protecting livestock from the elements. The weather station measures external elements and internal temperature to keep a dry and constant temperature within the shed.

Specification and options

- 2m to 100m long
- Variety of colours
- Bird netting available and recommended
- Choice of curtain materials
- Manual version with out weather station available
- 1 Phase or 3 phase power options
- Made to your shed requirements

Area of use

- Beef and dairy housing
- Pig housing
- Stable blocks and large indoor arenas

AirKoe

Light Ridge

The light ridge by AirKoe is designed to bring natural light into your shed whilst removing the hot polluted air. The effective system works similar to a chimney, with the wind baffles playing a vital role. Every Light ridge is custom made to each shed

Key features

- Spreads light throughout the shed, without creating hot spots
- Removes hot air and creates a chimney effect in the shed
- Natural light creates spatial attractiveness in the shed, whilst improving animal welfare

Specification

- 10mm polycarbonate
- Clear, opaque or athermic finish
- UV resistant
- High impact
- B1 fire category

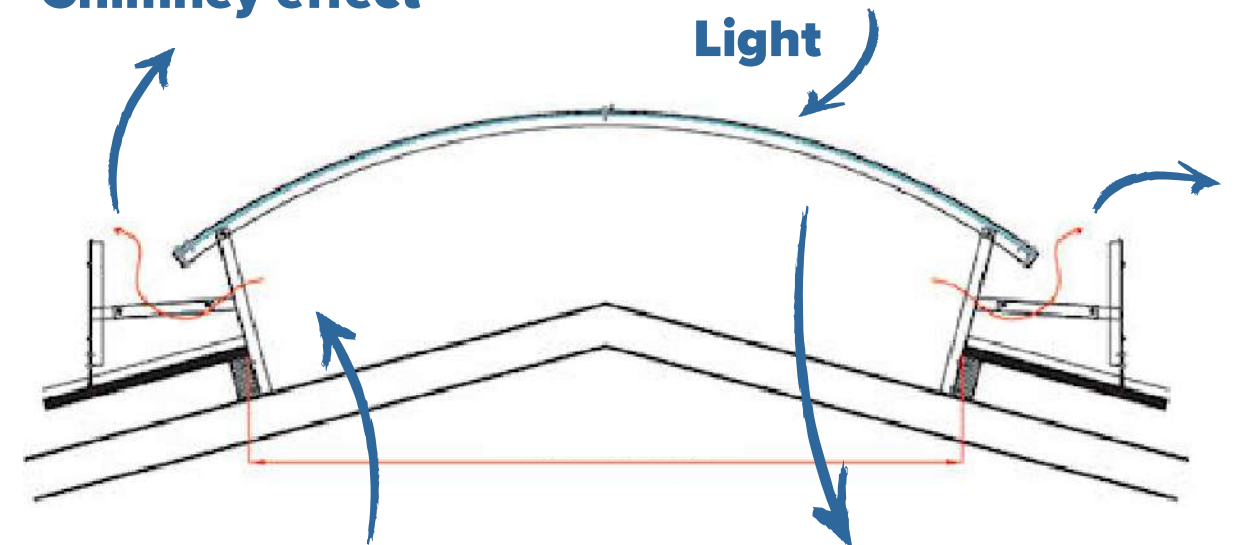

Specification

- Livestock housing
- Dairy parlours
- Indoor arenas
- American barn stabling

Chimney effect

Natural light

AirKoe

Cowsy Breeze

Cow Welfare Tube ventilation system, is an easy to fit system on existing or new sheds. Up to 8,800 litres per second of positive pressure can be applied through the ventilation system. Bringing fresh air into livestock sheds instead of re-circulating air within the shed offering greater productivity per animal and improved health. Poor air quality starts to show negative effects upon housed livestock at temperature above 20 degrees.

Key features

- Constant supply of fresh air
- Reduced effects from heat stress
- Increased lying times
- Fresh air dilutes airborne pathogens and irritants
- Reduced electricity consumption cost compared to other ventilation fan systems

Specification

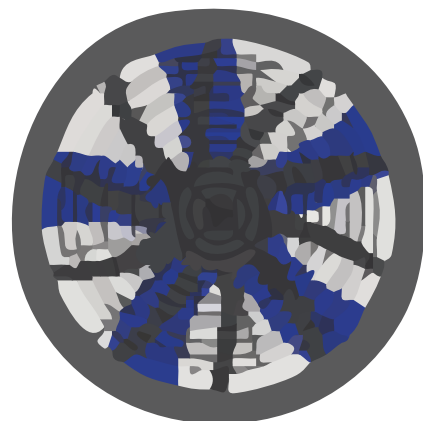

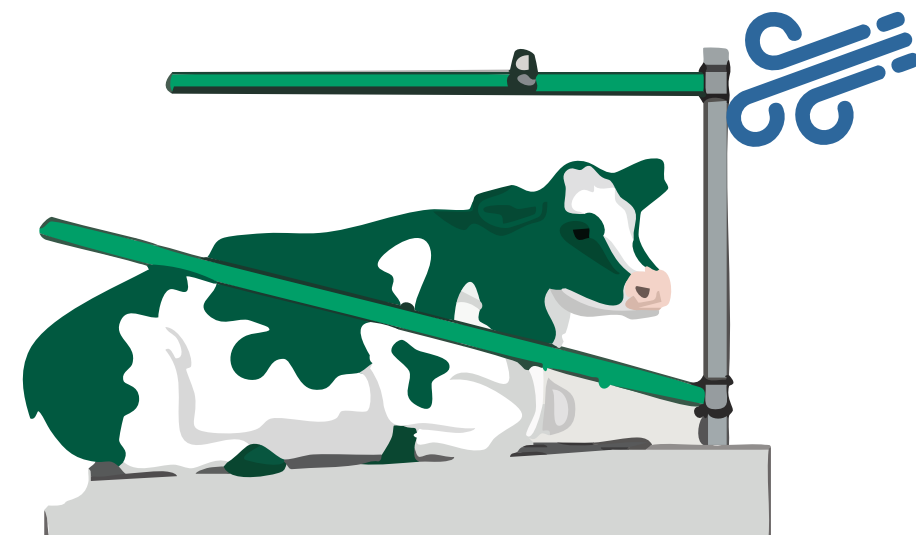

- Diameter 1.1 m
- Length 3m to 70m
- Non-flammable sock material
- Air speed 4.3 m³/sec (67% fan speed)
- Air speed 6.4 m³/sec (full speed)

Area of use

- Livestock lying areas
- Livestock feed fence areas
- Parlour area
- American barn stabling

Fresh air pulled in and distributed through sock

Calf Rearing

Intershape is the UK market importer and distributor for Calf-Tel who is renowned world wide for offering market leading external calf housing solutions. For the many years we have worked with Calf-Tel, we have many customers across the UK who can vouch for the benefits Calf-Tel products have brought to their livestock businesses.

View the website section

Original and best. Intershape is the leading supplier of Calf-Tel in the UK.

Standard features on all Hutches

✓ Original and best.

Deluxe Hutch

Deluxe hutch is our standard hutch, with integrated ridge ventilation. The hutch features an extrusion base to avoid rust and frost damage. Recommended use for calves (up to 8 weeks of age).

Area of use

- All dairy calf breeds
- Paired housing (when combined as paired hutches)
- Indoor and outdoor rearing

XXL Hutch

XXL is one of the largest hutches available, and suitable for paired rearing. Due to the larger cubic capacity, ventilation is greater. Although a large hutch, it retains industry best opacity and calf comfort.

Area of use

- All dairy calf breeds
- Beef/crossbreds calves
- Paired housing

Happy Hutch

What's a Happy Hutch for? Anything that fits through the door! The happy hutch is a small multipurpose hutch. UV protection and opaque construction keep the hut warm in winter and cool in summer.

Area of use

- Small dairy calf breeds
- Goats & kids, native sheep breeds
- Dog kennels

Multimax

The Multimax hutch is manufactured by Calf-Tel. The calf hutch is an industry leading product for grouped calf housing. To successfully ease the transition from individual to group rearing, the Multimax houses groups of up to 5 calves and forms part of the many tools needed for the continued growth and health of your calves.

Key features

- House 5 calves for 5 months
- High molecular weight polyethylene plastic for UV protection and durability
- Excellent ventilation through the openings in the roof and rear bedding door
- Height allows animals to stay in the hutch longer

Pre-weaned fronts for Multimax

Key features

Milk Feeding

Milk Bottles

- Easy clean and washable
- Transparent white to see milk
- Measuring lines
- 2.84 litres, 10L x 10W x 37H (cm)
- 3.8 litres, 10L x 13W x 37H (cm)
- Chutes to hold bottles onto pen fronts available
- Suits snap teat

5 Milk Feeder

- Easy clean and washable
- Individual compartment per teat
- Metal hooks with straps for secure mounting
- 30 litres, 80L x 33W x 38H (cm)
- Suits big softy teat

Milk Bucket

- Easy clean and washable
- Transparent to see milk
- Measuring lines
- Slotted holes to hook onto pen front
- 8 litres, 30L x 23W x 28H (cm)
- Brackets to hold buckets onto pen fronts available
- Suits Click and clip teat valves

Milk feeding

Snap Teat

- Breather valve encourages salivation
- Natural rubber
- Long lasting chew resistant
- 106L x 25W (mm)

Brush

- Double ended brush
- Plastic handle
- Designed to clean teats and buckets

Fix Clip Teat

- Easy to remove and clean
- Natural rubber
- Suited for young calves
- 125L x 26W (mm)

Big Softy Teat

- Fits multi/milk bar feeders
- Soft material
- Promotes natural sucking
- 80L x 21W (mm)

Whisk

- Stainless steel
- 6 wire loops
- Ideal for mixing milk powder

Click teat

- Valve stops air being sucked through
- Natural rubber

Disinfectant & Cleaner Range

Disinfectants and cleaners are held in stock and can either be ordered over the phone or from our website. For more information and data sheets scan the QR code or visit www.intershape.com.

Ecofoam Advanced

Ecofoam Advanced is a high performance alkaline foam cleaner formulated to tackle heavy soiling with fat and protein buildup. Its long cling formula ensures effective cleaning on heavily soiled areas. A dilution rate of 1:100 for normal conditions or 1:50 for heavy soiling.

Cyclex

Cyclex is proven in the defence against oocysts responsible for coccidiosis and cryptosporidiosis. Quat free, a chlorocresol, lactic acid and salicylic acid based disinfectant with strong microbial properties. Easy to mix and use. Suitable for use in poultry, cattle, pig, sheep and goat housing. Passed EN1656, EN1657, EN14349.

Neogen Viroxide Super

Neogen Viroxide Super is a broad-spectrum powder disinfectant recommended for use on hard surfaces and independently proven to act rapidly against bacteria and viruses such as avian influenza. It offers a wide range of applications, such as boot dips, aerial misting and fogging, disinfection of vehicles.

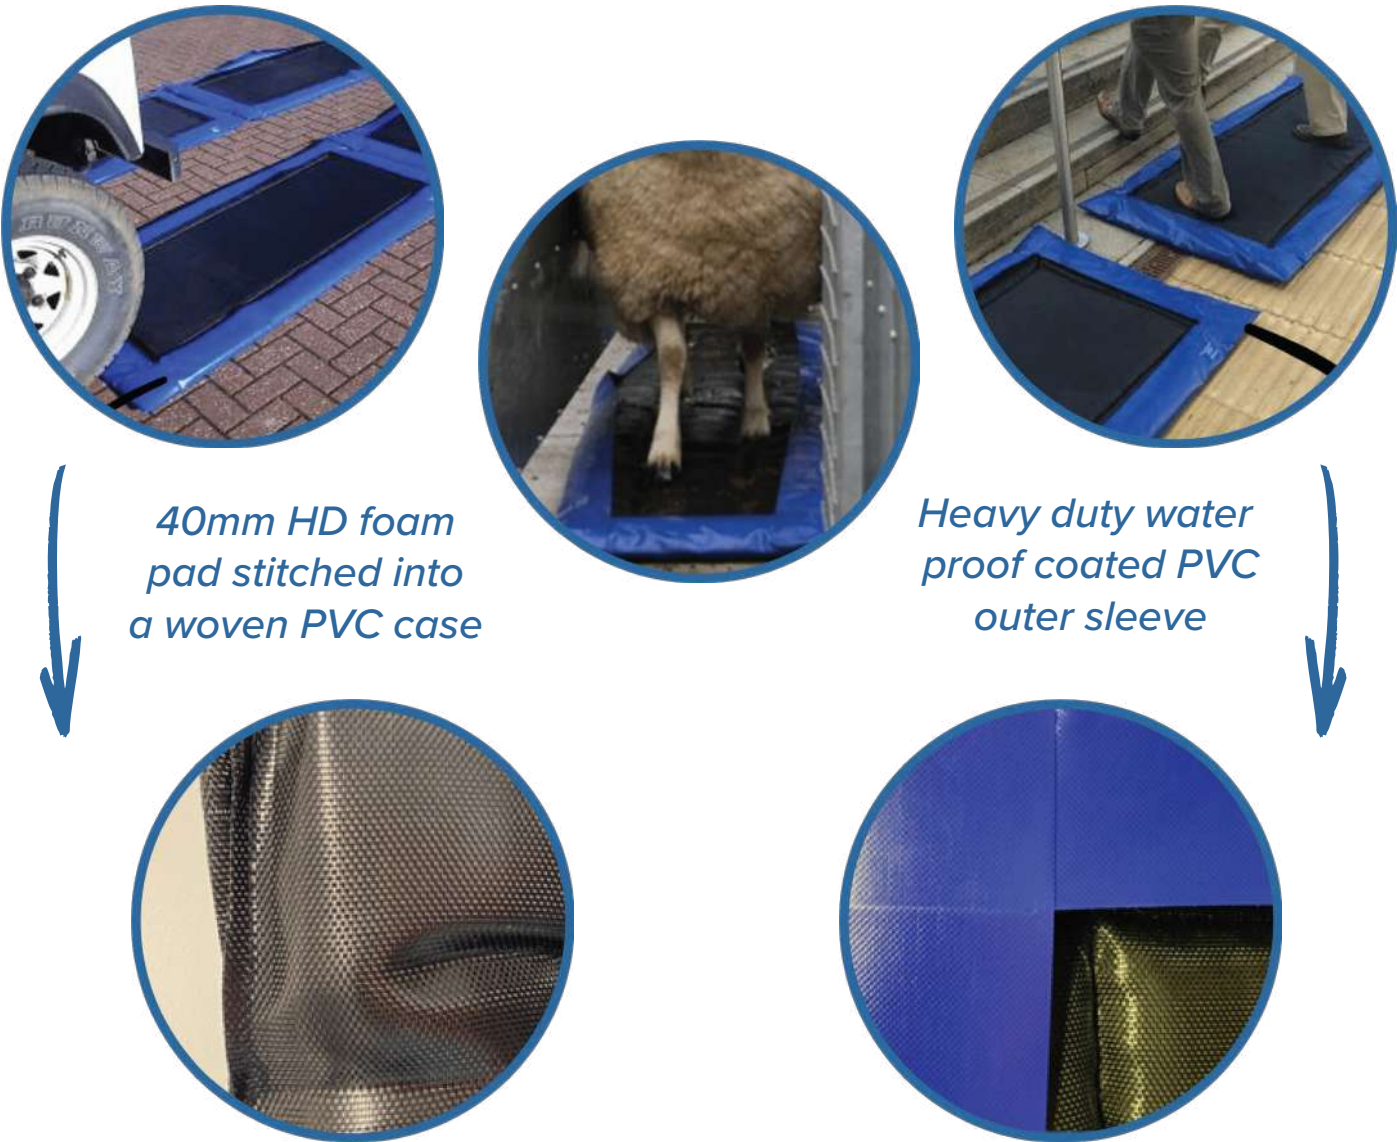

Envirex

Envirex Powder is a highly absorbent and hygienic bedding powder designed for all types of livestock and helps maintain a dry, healthy environment. It does not paste up to form clumps after drying, helping it reduce greasiness in animal accommodation, promoting a non-slip environment.

Disinfectant Mats

Disinfectant mats are an easy and effective way to disinfect before entering your premises. The HD foam pad within the mats reduce splashing and improve complete coverage. The outer sleeve retains the disinfectant solution and reduces losses by 75%.

Mat	Size	Capacity	Weight
Foot mat	0.6M x 0.9M	10L	3KG
Foot mat XL	1.8M x 0.9M	45L	6KG
Sheep mat	2.3M x 0.47M	30L	4KG
Vehicle mat	1.8M x 0.9M x4	180L	24KG

Equine Matting

Intershape has been importing, supplying and installing rubber matting for 30 years. Equine mats were a natural progression with our livestock matting customers often having horses as well. Intershape imports and supply Animat rubber made in Canada that comes with a 7 year warranty, and is made from 100% recycled rubber. Scan the QR code for more details.

"I have had stable mats from these guys on a number of occasions. The quality and price is second to none but more importantly the customer service and delivery is spot on. Thanks for a great product and job."

Mike McKinlay

Straight Edge Stable Mats

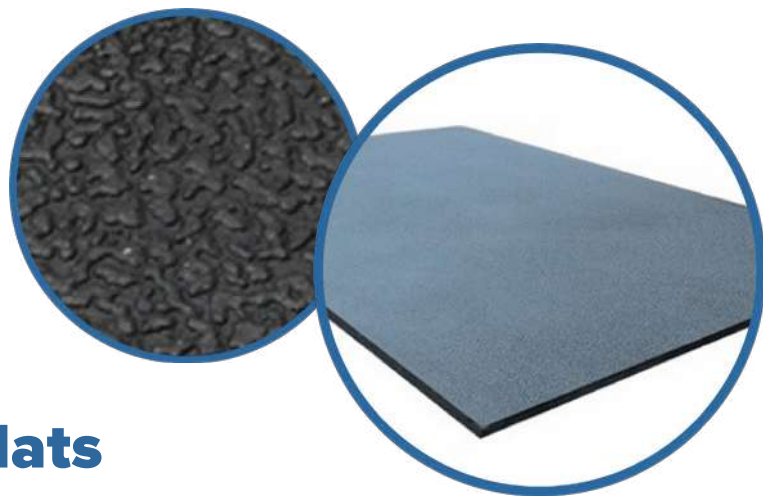

Rubber Flooring with unique ameobic top finish design, manufactured using the highest quality 100% recycled rubber, provides excellent comfort, surface grip and easy cleaning.

Specification

- Durable 19mm thick
- 100% recycled vulcanised rubber slip-resistant in wet or dry conditions
- Non-Porous: Ideal for urine, bacteria and odour management
- Mats can be trimmed, glued, or fastened
- Grooved underside of mat for drainage

Area of use

- Stables
- Walkways
- Wash areas

Interlocking Stable Mats

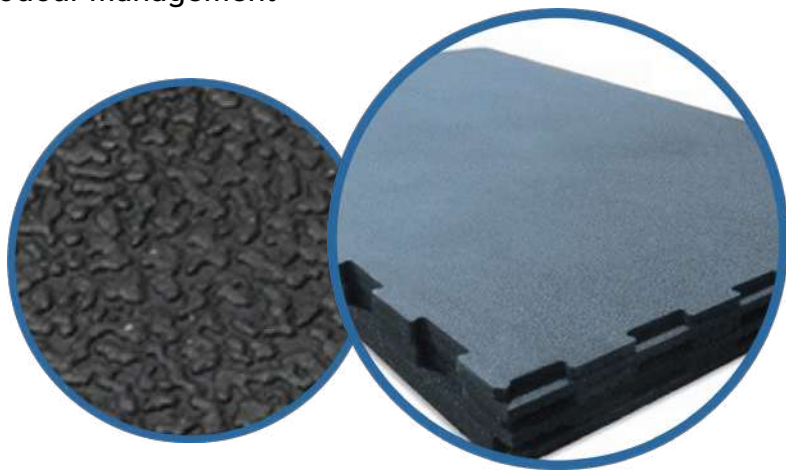

Interlocking mats create a firm joint between mats without the need for fixings, ideally suited for un-even floors, heavy horses, partially covering an area. Unique ameobic top finish design, either available as sets or designed to suit your space.

Specification

- Durable 19mm thick
- 100% recycled vulcanised rubber slip-resistant in wet or dry conditions
- Non-Porous: Ideal for urine, bacteria and odour management
- Mats can be trimmed, glued, or fastened
- Grooved underside of mat for drainage

Area of use

- Stables
- Walkways
- Wash areas
